

% Free Testosterone Reference Ranges (Free/Total Testosterone)

Males 1.29-2.87%  
 Females pre-menopausal ages 21-47 0.59-2.01%  
 Females post-menopausal ages 42-89 0.53-2.85%

PSA (Roche Cobas e)

0.590

0-4.00 ng/mL

Reported 01/08/2017

PSA levels should not be interpreted as absolute evidence of disease, however it is widely accepted as an adjunctive test in the management of prostate cancer patients. Values obtained with different assay methods or kits can not be used interchangeably.

Post-prostatectomy PSA normal <0.05.
